

ASSESSMENT OF MARGINAL WORKERS IN TAMILNADU A SOCIOECONOMIC ANALYSIS

Problem:

Assessment of marginal workers in Tamilnadu refers to the evaluation of the conditions and opportunities available to individuals who are employed in low-paying and insecure jobs. These workers often lack access to employment benefits, including social security, health insurance, and pension schemes. A socio-economic analysis of marginal workers in Tamilnadu would examine the various social and economic factors that contribute to their marginalization.

Sampling Strategy.

Ethical Considerations.

Data Analysis Plan.

Resource Allocation.

Stakeholder Engagement.

Data Security.

Feedback Mechanism.

Contingency Plans.

Assessment of marginal workers in Tamil Nadu is of significant importance from a socio-economic perspective.
